

TECCHNICAL ARCHITECTURE

DATE	18 NOVEMBER 2022
TEAM ID	PNT2022TMID19223
PROJECT TITTLE	A GESTURE BASED TOOL TOOL FOR STERILE BROWSING RADIOLOGY IMAGES
TOTAL MARKS	4 MARKS

SOLUTION ARCHITECTURE :

A complicated process with numerous sub-process,solution architecture connects with technical solutions . This objectives are

- a.Find the best technical solution for addressed issue
- b.Describe to the stakeholders the software`s structure ,traits behaviour,& other features .
- c.Define the solution requirements , development stages and features.

TECHNICAL ARCHITECTURE FOR THIS ISSUE :

We used Machine learning to solve this project. To create the dataset to used tool developed from the MatLab in this issue .To used matlab tool to autogenerate the data to create the dataset.In this project our team team solve the problem for the diabetes diagnose software tool by using Machine Learning.This solution architecture has four deliverable phases .
